

WHAT'S ON A UTILITY POLE?

- A Distribution Power Lines** - Located on top of the pole, distribution wires carry electricity from substations.
- B Transformers** - reduces high voltage into lower secondary voltage for use by customers. Located about 30 feet from the ground
- C Secondary Power Lines** - carry electricity to homes and businesses and are located about 30 feet from the ground.
- D Telephone/Cable wires** - typically the lowest wires on the pole at about 20 feet from the ground.
