

Smart Meters

save

The DTE Insight app, available free for your smartphone or tablet, links to your smart meter to show you exactly how much energy you use and when you use it. Add the DTE Energy Bridge, and you'll see your usage in real-time. Customers using these tools have reduced their energy usage on average by 5 to 10 percent each month. Lower usage means a lower bill.

DTE Energy

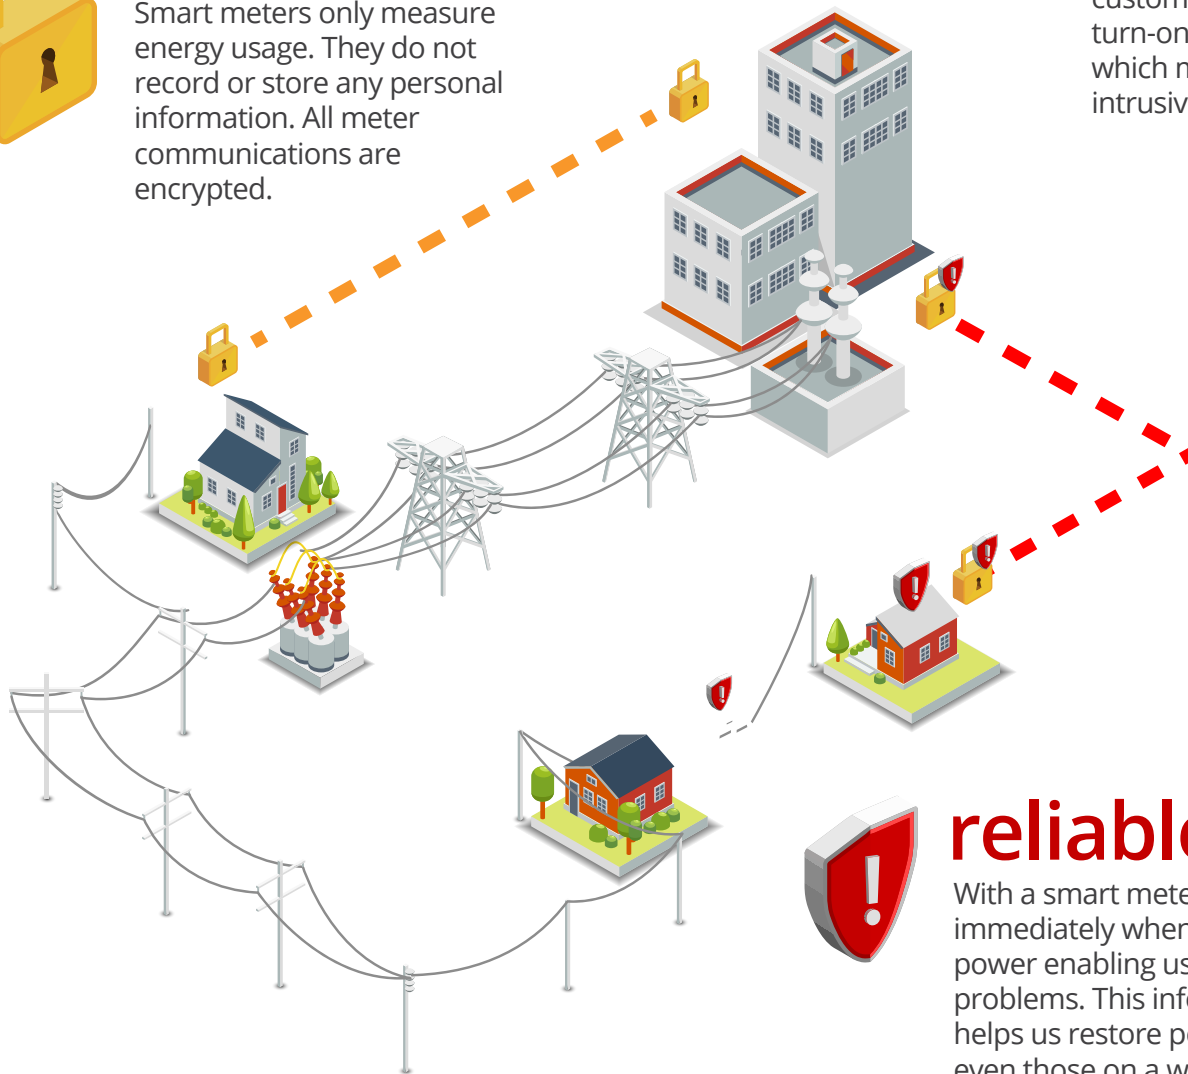

secure

Smart meters only measure energy usage. They do not record or store any personal information. All meter communications are encrypted.

service

Smart meters enable the completion of same day customer requested turn-ons/disconnects, which means faster, less intrusive service.

reliable

With a smart meter, DTE knows immediately when you lose power enabling us to pinpoint problems. This information helps us restore power outages, even those on a wide scale, much quicker.
