

2022 Sustainability Highlights

At Beacon Park, we believe sustainability and environmental responsibility are key in helping to create communities that are not only resilient to climate change and socially equitable but also accessible and economically prosperous. We work to ensure Michigan thrives from our efforts to help reduce waste and improve the environment through recycling initiatives, education and programming.

We focus our efforts and our sustainability priorities on six areas:

- Community Awareness & Education
- Environment
- Green Infrastructure
- Transportation Access
- Trees & Vegetation
- Waste Management

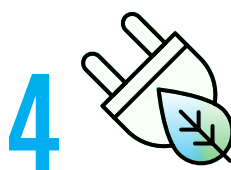

2.87 tons
of waste recycled

41 trees
on site capturing 1,500
pounds of CO₂ annually

Located near
2 bus lines
connecting visitors to
local attractions

4
**electric vehicle
charging stations**
nearby

10-minute
walk to Rosa Parks Transit
Center, QLine and bike stations

Nearby bike lanes and
20+ bike racks

Lumen Detroit is a Leadership in Energy & Design (LEED)

Silver Certified building

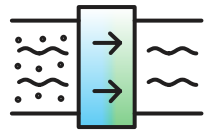

3,400 sq. ft. 

green roof that reduces
surface runoff by 24% and
holds 3 inches of rainwater

Serves sustainably sourced

**beer and
spirits**

4 bioswales
help filter pollutants and
reduce stormwater runoff

**4 recycling
stations**
